ORCHIDACEAE & ARACEAE

Discover the strength of Anthuriums

In 2018, Floricultura expanded its product range with Anthurium. The Anthurium world can do with a bit fresh air; with new varieties and, above all, can do with a different approach to the market. We are convinced of our ability to add value to the Anthurium market.

Our Anthurium range

We proudly present you our best selection of our Anthurium young plants. All varieties are suitable for various pot sizes, climate conditions, and consumer types. Pot sizes range from 6 to 17 cm. In addition to the different pot sizes, we can offer you a wide variety of quite distinctive colours as you can see in this catalogue.

In this catalogue you will find our finest Anthurium range. Please contact one of our account managers to get more information about this product range and the availability of the varieties.

Discover the strength of Spathiphyllums

Our Spathiphyllum range

We proudly add Spathiphyllum young plants to our assortment. Spathiphyllum young plants accommodate growers who want to produce and supply high-quality plants. Strength and versatility best describes our range. The plants are grown from seed and tissue culture. Their strengths allow for longer transportation and longer shelf life. Our Spathiphyllum young plants are suitable for various pot sizes. It starts with 6.5, 9 and 13 cm pot size for short models. We also have pot sizes 13 cm and 17 cm for tall models and also varieties specially selected for 17 cm and 23 cm pot.

Our Spathiphyllum range is developed by Van der Voort Young Plants, a company specialised in breeding and propagation of these plants for over 20 years. Floricultura and Van der Voort Young Plants established a partnership in 2018.

You will find our entire Spathiphyllum range in this catalogue. Please contact one of our account managers to get more information about this product range and the availability of the varieties.

The specifications with regard to varieties are determined on the basis of multiple measurements conducted at Floricultura and a number of test locations. Spike length and percentages depend strongly on cultivation method used and local conditions.

All figures listed in this catalogue were carefully compiled by Floricultura. Please bear in mind that these are only indicative. No rights can be derived from them. Spike percentages based on insufficient data are not being published on this website. If you have any questions or require clarification about anything please contact one of our account managers.
